Caimi Brevetti

MADE IN ITALY SINCE 1949

I_Fondata nel 1949, Caimi è una delle principali realtà produttive europee design oriented nel settore dell'arredamento, dei complementi d'arredo e delle soluzioni acustiche per l'ufficio, la casa e il contract. Da **oltre 70 anni** Caimi continua a ricercare e sperimentare nuove soluzioni per migliorare concretamente la vita delle persone e gli ambienti in cui vivono. Grazie a una sofisticata integrazione fra struttura produttiva e logistica, gestisce con successo una gamma di prodotti composta da oltre **3.000** articoli e **35.000** componenti, garantendo alla propria clientela tempi di consegna estremamente rapidi.

EN_Founded in 1949, Caimi is one of the leading European design-oriented manufacturers of furniture and complements for the office, home and contract sectors. For **over 70 years** Caimi has continued to research and assay new solutions for the betterment of people's lives and living spaces. Thanks to its sophisticated integration of production line work and logistics operations, Caimi can effect extremely fast deliveries of any orders from its product range, which is made up of around **3.000** items and more than **35.000** separate components.

SUSTAINABILITY

I_Caimi, da sempre sensibile nei confronti delle tematiche ambientali e dell'ecosostenibilità, utilizza, dove tecnicamente possibile, materiali riciclabili o riutilizzabili. La produzione è composta in prevalenza da oggetti monomaterici, facilmente riciclabili: gli oggetti composti da più materiali sono in larga parte pensati per essere disassemblabili, consentendo di riciclare separatamente i singoli componenti.

EN_Caimi has always had an attentive eye for environmental issues and ecosustainability. This is why, if technically feasible, we use recyclable or reusable materials. Production consists mainly of single-material, easily recyclable objects: objects made of multiple materials are in most cases designed to be disassembled. This allows separate recycling of the individual components.

Research & Technology

Caimi Open lab

RESEARCH, ACADEMY & NO PROFIT

I_Caimi Open Lab è uno spazio all'avanguardia che vanta 7 laboratori avveniristici dedicati alla ricerca teorica e applicata in ambito tecnologico, acustico e fisico. Un centro di ricerca volto a sperimentare il comportamento del suono, le capacità percettive dell'uomo e gli effetti che il suono ha sull'essere umano.

EN_Caimi Open Lab is an advanced facility housing 7 futuristic laboratories dedicated to theoretical and applied research in technology, acoustics and physics. The purpose of the research facility is to carry out experiments on the behaviour of sound, on the perceptive capacities of humans, and on the effects of sound on people.

Caimi Open Lab:

ACADEMY & NO-PROFIT

I_Open Lab è anche una struttura no profit gratuitamente messa al servizio di Università, Istituti di Ricerca, Fondazioni ed Enti. Open Lab, un grande laboratorio aperto al mondo, perché non esiste innovazione senza ricerca.

EN_Open Lab also operates as a not-for-profit entity that is placed free of charge at the disposition of universities, research institutes, foundations and public-sector bodies. Open Lab: A laboratory complex whose doors are open to the world; without research, there can be no innovation.

Snowsound Fiber

ACOUSTIC TEXTILES (PATENTED)

I_La tecnologia brevettata Snowsound Fiber è basata su morbide fibre acustiche di poliestere intrinsecamente ignifughe e interconnesse tra loro. L'interazione tra le fibre di Snowsound Fiber e l'aria permette di controllare il riverbero regolando con precisione la risposta acustica dell'ambiente in base alle modalità di posa, alla superficie e alla distanza tra le fibre e la parete, consentendo di ridurre il fastidioso riverbero acustico negli ambienti, migliorando la qualità della vita e del lavoro.

EN_The patented Snowsound Fiber technology is based on soft interwoven polyester acoustic fibers that are inherently fire-resistant. The interaction between Snowsound Fiber and air allows controlling reverberation while adjusting the environment's acoustics with precision taking advantage of installation modes, product's surface and distance from the wall. This reduces the annoying acoustic reverberation improving quality both of life and of work.

SNOWSOUND

I materiali Snowsound Fiber sono stati testati secondo la norma UNI EN ISO 354. I grafici in funzione dell'applicazione sono disponibili nel sito www.caimi.com. La scelta dei diversi tipi di materiale Snowsound Fiber e la modalità di installazione, consentono di poter privilegiare l'assorbimento di specifiche frequenze (basse, medie o alte) o di assorbire diverse frequenze in modo uniforme. Il comportamento di Snowsound Fiber, in base al materiale e alle modalità di installazione, varia in termini di classe di assorbimento che può raggiungere la **classe A**.

EN_Snowsound Fiber materials have been tested according to UNI EN ISO 354. The graphs for each application can be found on our website www.caimi.com. The choice of different Snowsound Fiber materials and the installation modes allow a selective absorption at precise ranges (low, medium, high) or a more uniform absorption at all frequencies. Snowsound Fiber's behavior varies based on the selected material and the installation mode and can reach **A class** for sound absorption.

Acoustic services & configurator

Snowsound Software

ACOUSTIC PROJECT WITH SNOWSOUND

I_Caimi ha sviluppato **due software di calcolo** che mette liberamente a disposizione dei clienti per progettare l'acustica in ambienti nuovi o esistenti. La precisione dei software Snowsound è comprovata dagli oltre **100.000 calcoli acustici** effettuati nel corso degli anni, da **2 premi internazionali** ricevuti e dal nuovo laboratorio di ricerca **Open Lab** che permette di sviluppare ricerca sempre più avanzata.

EN_Caimi developed **two acoustic design softwares** that are offered to customers completely free of charge, applicable to both new or existing environments. The precision of the software is proven by more than **100,000 acoustic calculations** made over the years, by the **2 international awards** received and by the new research laboratory **Open Lab** that allows to develop increasingly advanced research.

Textile finishes

Fiber 7

VELO - ACOUSTIC TEXTILES

I_Tessuto acustico leggero e semi-trasparente, satinato e brillante, caratterizzato da una texture fine in tinta unita o con lievi fiammature di colore. L'effetto "VELO" elimina le barriere visive tra outdoor e indoor oppure tra gli spazi interni di uno stesso ambiente. Realizzato in poliestere riciclabile al 100%. Fiber 7 ha Classe di reazione al fuoco Euroclass B-s1, d0.

EN_A light, semi-transparent acoustic fabric, satiny and shiny, characterised by a fine texture in solid colours or with slight flashes of colour. The 'VELO' effect eliminates visual barriers between outdoor and indoor or between interior spaces in the same room. Made of 100% recyclable polyester. Fiber 7 has Euroclass B-s1, d0 classification as to reaction to fire.

Fiber 3

MELANGE - ACOUSTIC TEXTILES

I_Tessuto acustico mano “lana”, ottenuto dall’insieme di filati composti da fibre melange. Il tessuto non presenta una direzione precisa e questo permette di lavorarlo e tagliarlo secondo diverse forme. Realizzato in poliestere riciclabile al 100%. Fiber 3 ha Classe di reazione al fuoco Euroclass B-s1, d0.

EN_Acoustic “wool” finish woven fabric, obtained from the set of yarns composed of mélange fibres. The fabric does not have a precise direction and this allows to work and cut it according to different shapes. Made of 100% recyclable polyester. Fiber 3 has Euroclass B-s1, d0 classification as to reaction to fire.
